

Routine exams, immunizations and screenings for members age 18 and under

Being your healthy best is a little easier when you focus on prevention. That’s why we encourage members to follow these preventive care guidelines. They are recommended by the U.S. Preventive Services Task Force and are consistent with the Affordable Care Act. These screenings and services are covered at no cost when performed by an in-network provider. If no plan limit is specified, we cover your preventive care during primary doctor visits.
