I. Description

- II. Reconstructive breast surgery is performed following a mastectomy, lumpectomy or prophylactic mastectomy for high-risk patients to re-establish symmetry between the two breasts. It includes reconstruction of the mastectomy site, creation of a new breast mound and creation of a new areolar complex following removal of a breast. It also includes reconstruction of a non-diseased breast to achieve symmetry.

III. Criteria: CWQI HCS-0011

- A. Moda Health covers breast reconstruction for **ALL** of the following conditions:
 - a. In accordance with the Women's Health and Cancer Rights Act of 1998 Moda Health covers reconstruction surgery following a mastectomy for the diagnosis of cancer or cancer prophylaxis as medically necessary including **1 or more** of the following conditions:
 - i. The original reconstruction of the breast following mastectomy, including the areolar complex, on which the mastectomy was performed for **1 or more** of the following:
 1. Reconstruction can be performed at any phase or timeframe post mastectomy for commercial and Medicare members
 2. Reconstruction must occur within 5 years of mastectomy for Medicaid members (*See Oregon Guideline Note 79*).
 - ii. The surgery and reconstruction of the opposite breast to achieve a symmetrical appearance
 - iii. Prostheses and physical complications at all stages following the original mastectomy including all lymphedemas
 - iv. Inpatient care related to the mastectomy and post-mastectomy services
 - v. Reconstruction is covered for both females and males following a mastectomy or lumpectomy for breast cancer.
 - b. Surgery for breast reconstruction/augmentation for which medical necessity cannot be established is considered cosmetic and is not covered by the plan (*refer to member handbook language for cosmetic exclusions*).
 - c. If the breast reconstruction requested is related to gender reassignment, *refer to Moda Health Gender Reassignment criteria CWQI: HCS-0145 and Member's Plan Handbook*.

IV. Information Submitted with the Prior Authorization Request:

1. Clinical records from the treating physician to include:
 - a. Original diagnosis and date of mastectomy
 - b. Phases of reconstructive surgery and completion dates
 - c. Documentation of pain, contractures, complications or reconstruction, etc.
