

November 1, 2016

Dear Billing/Office Manager,

Moda Health has partnered with Magellan Rx Management (Magellan Rx) to assist you in medical pharmacy management through the provider administered injectable drug program. We are committed to providing our members with access to high-quality healthcare. To ensure our members receive quality and affordable care, we will implement updates to the review and approval processes of certain injectable medications.

Effective January 1, 2017, 12 new medications will be added to the prior authorization list of medications currently in the Magellan Rx program.

Magellan Rx will review your prior authorization requests for the following specialty injectable medications, along with other specialty medications that are already part of the program when administered in:

- an outpatient facility
- a patient’s home
- a physician’s office

Brand name	Generic name	HCPCS code
Aldurazyme	laronidase	J1931
Aralast NP	Alpha-1 proteinase inhibitor	J0256
Cuvitru	subcutaneous immunoglobulin	J3590
Gazyva	obinutuzumab	J9301
Glassia	Alpha-1 proteinase inhibitor	J0257
Lumizyme	alglucosidase alfa	J0221
Naglazyme	galsulfase	J1458
Prolastin	Alpha-1 proteinase inhibitor	J0256
Prolastin-C	Alpha-1 proteinase inhibitor	J0256
Sustol	granisetron extended-release	J3490
VPRIV	velaglucerase alfa	J3385
Zemaira	Alpha-1 proteinase inhibitor	J0256

Completing prior authorization requests through Magellan Rx will help expedite claims processing and doesn’t require you to submit medical records. If you don’t obtain a prior authorization, your claims may be delayed or denied until we receive the information needed to establish medical necessity.
