Prescription drug list

*An evidence-based pharmacy program that works for you*

For medications not listed, Moda Health provides an online drug price check tool for members. You can access this resource by logging in to your myModa account at modahealth.com and choosing the Pharmacy tab.

**What is the Moda Health Preferred Drug Program?**
The Moda Health Preferred Drug Program is a pharmacy program that offers a choice of medications that are safe and effective treatments. The program provides value to Moda Health members by saving them money on prescription medications.

**How does the program work?**
This program uses a tiered copay/coinsurance system. Members and their doctors can choose between the value tier, select tier, and preferred tier. Each tier has a different copay/coinsurance amount and what you pay depends on your plan. Refer to your Member Handbook or call Moda Health for plan details or specific medication tier information.

**Who makes decisions about medications on the prescription drug list?**
The list is developed and maintained by a group of doctors and pharmacists called the Pharmacy and Therapeutics Committee. These doctors and pharmacists are not employed by Moda, but may see patients who have Moda coverage. The Committee makes decisions based on information about a medication’s safety, effectiveness and associated clinical outcomes.

For more information about our Preferred Drug Program, please visit modahealth.com or call us toll-free at 888-361-1610.
How to read your prescription drug list

Refer to the chart below for a list of prescription medications covered by Moda Health. Medications that are new to the market are subject to a review period. Please contact us if you are taking a medication that is new to the market.

Some medications have special requirements that could affect your prescription. To find out more information about the restrictions in the prescription drug list below, please refer to the “Medication Restrictions list” at modahealth.com/pdfs/rx_priorauth.pdf.
