Scope
This policy applies to all Commercial medical plans, Medicare Advantage plans, and Oregon Medicaid/EOCCO plans.

Reimbursement Guidelines

For Professional and Clinical Laboratory Services (including Dialysis Centers and Home Health):

Venipuncture is the most common method used to obtain blood samples for blood or serum lab procedures. The work of obtaining the specimen sample is an essential part of performing the test. Reimbursement for the venipuncture is included in the reimbursement for the lab test procedure code.

CPT Code 36415

For Moda Health Advantage: 36415 is eligible for separate reimbursement, consistent with Original Medicare payment policy.

For all other lines of business: The following policies apply.

CPT 36415 is only eligible to be billed once, even when multiple specimens are drawn or when multiple sites are accessed in order to obtain an adequate specimen size for the desired test(s).4

Moda Health does not allow separate reimbursement for CPT 36415 (venipuncture) when billed in conjunction with a blood or serum lab procedure performed on the same day and billed by the same provider (procedure codes in the 80048 - 89399 range). 36415 will be denied as a subset to the lab test procedure.

If some of the blood and/or serum lab procedures are performed by the provider and others are sent to an outside lab, CPT 36415 is not eligible for separate reimbursement.
Modifier 90 (reference laboratory) will not bypass the subset edit. The outside laboratory that is actually performing the test will need to bill Moda Health directly for the lab tests in order for 36415 to be separately reimbursable to the provider performing the venipuncture to obtain the specimen for the outside laboratory.

The use of modifiers XS, XP, XE, XU, or 59 with 36415 when blood/serum lab tests are also billed is not a valid use of the modifier. The venipuncture is not a separate procedure in this situation.

Moda Health does allow separate reimbursement for CPT 36415 when the only other lab services billed for that date by that provider are for specimens not obtained by venipuncture (e.g. urinalysis).

**CPT code 36416**

CPT 36416 is designated as a status B code (bundled and never separately reimbursed) on the Physician Fee Schedule RBRVU file. Moda Health clinical edits will deny CPT code 36416 to provider responsibility. This applies whether 36416 is billed with another code or as the sole service for that date. This edit is not eligible for a modifier bypass.

Denial explanation codes include:
- WGO *(Service/supply is considered incidental and no separate payment can be made. Payment is always bundled into a related service)*
- Z39 *(This claim line is being disallowed because the procedure code has no Medicare relative value unit and may be considered incidental.)*

835 CARC/RARC denial combination:
- CARC 97 – *(The benefit for this service is included in the payment/allowance for another service/procedure that has already been adjudicated. Usage: Refer to the 835 Healthcare Policy Identification Segment (loop 2110 Service Payment Information REF), if present.)*
- RARC M15 – *(Separately billed services/tests have been bundled as they are considered components of the same procedure. Separate payment is not allowed.)*

**CPT codes 36591 and 36592**

CPT codes 36591 and 36592 are eligible for separate reimbursement only under very limited and specific circumstances.
- The CPT book includes parenthetical guidelines below these codes which state: “(Do not report 36591 [or 36592] in conjunction with other services except a laboratory service.)” *(AMA\(^8,9\))*
- Under CMS guidelines, CPT 36591 and 36592 are designated as status T codes on the Physician Fee Schedule RBRVU file. Status T is defined as “There are RVUs and payment amounts for these services, but they are only paid if there are no other services payable under the physician fee schedule billed on the same date by the same provider. If any other services payable under
the physician fee schedule are billed on the same date by the same provider, these services are bundled into the physician services for which payment is made.”

CPT codes 36591 or 36592 will be denied when reported in conjunction with other non-laboratory services. This may be identified by Moda Health clinical edits or by coding-to-records review. The denial is not eligible for a modifier bypass.

For example:

CPT codes 36591 and 36592 may not be submitted in combination with chemotherapy services. The collection of the blood sample is included in the reimbursement for the chemotherapy administration service, and may not be separately reported on the claim. This limitation applies to both the professional services and facility claims.

Denial explanation codes include:

WGT (Bundled or incidental service/supply. Not eligible for separate payment, per CPT and/or CMS guidelines.)

771 (Claim review results. Item(s)/services identified as not eligible to be separately reported or never eligible for separate reimbursement.)

u10 (Separately billed services/tests have been bundled as they are considered components of the same procedure. Separate payment is not allowed.)

835 CARC/RARC denial combinations:

CARC 97 (The benefit for this service is included in the payment/allowance for another service/procedure that has already been adjudicated.)

RARC N390 (This service/report cannot be billed separately.)

CARC 97 (The benefit for this service is included in the payment/allowance for another service/procedure that has already been adjudicated.)

RARC M15 (Separately billed services/tests have been bundled as they are considered components of the same procedure. Separate payment is not allowed.)

Handling fees, CPT codes 99000 and 99001

CPT codes 99000 and 99001 are designated as status B codes (bundled and never separately reimbursed) on the Physician Fee Schedule RBRVU file. Moda Health clinical edits will deny CPT 99000 or 99001 with explanation code WGO (Service/supply is considered incidental and no separate payment can be made. Payment is always bundled into a related service), whether 99000 or 99001 is billed with another code or as the sole service for that date. This edit is not eligible for a modifier bypass.

For Ambulatory Surgery Centers (ASC):

Per CMS policy, routine venipuncture or other routine collection of specimens, if needed, is not separately reimbursable to ASCs. These services are included in the packaged reimbursement for the primary procedure or service.
For Inpatient Hospital and Outpatient Hospital (OPPS) Services:

A maximum of one collection fee (any procedure code) is allowed per specimen type (venous blood, arterial blood) per date of service, per CMS policy. Specimen collections out of an existing line (e.g. arterial line, CVP line, port, etc.) are not separately reimbursable.

Background Information

Venipuncture or phlebotomy is the puncture of a vein with a needle or an IV catheter to withdraw blood. Venipuncture is the most common method used to obtain blood samples for blood or serum lab procedures, and is sometimes referred to as a “blood draw.”

Collection of a capillary blood specimen (36416) or of venous blood from an existing access line or by venipuncture that does not require a physician's skill or a cutdown is considered “routine venipuncture.”

Coding Guidelines

- When existing vascular access lines or selectively placed catheters are utilized to procure arterial or venous samples, reporting the sample collection separately is inappropriate. (CMS)

- CPT codes 36500 or 75893 may occasionally be appropriate if more extensive work beyond routine venipuncture is required. For instance, if a physician needs to place a catheter to obtain a blood specimen from a specific organ or location. CPT codes 36500 (venous catheterization for selective organ blood sampling) or 75893 (venous sampling through catheter with or without angiography...) may be reported for venous blood sampling through a catheter placed for the sole purpose of venous blood sampling. CPT code 75893 includes concomitant venography if performed. (CMS)

- If a catheter is placed for a purpose other than venous blood sampling with or without venography (CPT code 75893), it is a misuse of CPT codes 36500 or 75893 to report them in
addition to CPT codes for the other venous procedure(s). CPT codes 36500 or 75893 should not be reported for blood sampling during an arterial procedure. (CMS³)

- Only one collection fee is allowed for each type of specimen for each patient encounter, regardless of the number of specimens drawn. When a series of specimens is required to complete a single test (e.g., glucose tolerance test), the series is treated as a single encounter. (CMS⁴)
- “(Do not report 36591 in conjunction with other services except a laboratory service.)” (AMA⁸)
- “(Do not report 36592 in conjunction with other services except a laboratory service.)” (AMA⁹)

IMPORTANT STATEMENT

The purpose of Moda Health Reimbursement Policy is to document payment policy for covered medical and surgical services and supplies. Health care providers (facilities, physicians and other professionals) are expected to exercise independent medical judgment in providing care to members. Reimbursement policy is not intended to impact care decisions or medical practice.

Providers are responsible for accurately, completely, and legibly documenting the services performed. The billing office is expected to submit claims for services rendered using valid codes from HIPAA-approved code sets. Claims should be coded appropriately according to industry standard coding guidelines (including but not limited to UB Editor, AMA, CPT, CPT Assistant, HCPCS, DRG guidelines, CMS’ National Correct Coding Initiative (CCI) Policy Manual, CCI table edits and other CMS guidelines).

Benefit determinations will be based on the applicable member contract language. To the extent there are any conflicts between the Moda Health Reimbursement Policy and the member contract language, the member contract language will prevail, to the extent of any inconsistency. Fee determinations will be based on the applicable provider contract language and Moda Health reimbursement policy. To the extent there are any conflicts between Reimbursement Policy and the provider contract language, the provider contract language will prevail.
