Reimbursement Policy Manual

Policy #: RPM023

Policy Title: Procedure Codes Assigned to Surgical Benefit Categories

Section: Surgery  Subsection: None

Scope: This policy applies to the following Medical (including Pharmacy/Vision) plans:
- All Companies: Moda Partners, Inc. and its subsidiaries & affiliates
- Eastern Oregon Coordinated Care Organization (EOCCO)
- OHSU Health IDS

Companies: Moda Health Plan
- Moda Assurance Company
- Summit Health Plan
- Moda Health Plan
- Moda Assurance Company
- Summit Health Plan
- OHSU Health IDS

Types of Business: All Types
- Commercial Group
- Commercial Individual
- Commercial Marketplace/Exchange
- Commercial Self-funded
- Medicaid
- Medicare Advantage
- Short Term
- Other: _____________

States: All States
- Alaska
- Idaho
- Oregon
- Texas
- Washington

Claim forms: CMS1500 CMS1450/UB (or the electronic equivalent or successor forms)

Date: All dates
- Specific date(s): ___________
- Date of Service; For Facilities: n/a
- Facility admission
- Facility discharge
- Date of processing

Provider Contract Status: Contracted directly, any/all networks
- Contracted with a secondary network
- Out of Network

Originally Effective: 1/1/2000  Initially Published: 5/8/2013

Last Updated: 10/12/2022  Last Reviewed: 10/12/2022

Last update includes payment policy changes, subject to 28 TAC §3.3703(a)(20)(D)? No

Last Update Effective Date for Texas: 10/12/2022

Reimbursement Guidelines

A. General

Procedure codes are assigned to a surgical benefit category based on the nature of the procedure and when Medicare (CMS) considers the code to be a surgical procedure based on the various indicators on the physician fee schedule.

B. Types of Surgical Benefit Categories

Surgical benefit categories include both general surgical procedures and certain specific surgery benefit categories, including but not limited to:
- Endoscopic surgery
- Infertility surgery
- Family Planning surgery
- Maternity surgery
- Medicare Routine Foot Care
- Transplant surgery
C. Nature of the Procedure

Surgical procedures do not always require general anesthesia, an operating room, a skin incision, or sutures to be considered a surgical procedure. Surgical procedures include but are not limited to the following:

- Incision
- Excision
- Amputation
- Introduction (of needles, catheters, or instruments, etc.)
- Endoscopy
- Repair
- Destruction (e.g., warts, lesions, abnormal tissue, etc.)
- Sutures
- Manipulation
  - Treatment of fractures
  - Treatment of dislocations
- Treatment of burns

D. Medicare (CMS) Indicators of Surgical Procedures

   - a. All procedure codes with a global days indicator of “10” and “90” on the Medicare (CMS) physician fee schedule are considered a surgical procedure code.
   - b. Procedure codes with a global days indicator of “0” days:
     - i. Most are considered a surgical procedure code.
     - ii. Some are not considered a surgical procedure code, depending upon the nature of the service described.
   - c. Global days indicator of “MMM” are considered maternity services. Specific Maternity procedures (cesarean delivery, Ligation or transection of fallopian tube(s), hysterectomy after cesarean delivery, etc.) are also considered Maternity surgical codes.
   - d. Procedure codes with a global days indicator of “XXX,” “YYY,” and “ZZZ” may be considered a surgical procedure code, depending upon the nature of the service described.
     Contributing factors to help clarify the nature of the service include:
     - i. Key words in the procedure code description.
     - ii. Methods used to perform the procedure.
     - iii. Other indicators on the physician fee schedule.

2. When a determination needs to be made whether a new procedure code is or is not a surgical procedure before the CMS indicator information is available (global surgery days and others), the procedure code description wording itself is used to make the determination.

E. Locations and Settings

Depending upon the nature and extent of the service, a surgical procedure may be performed in a wide variety of settings, including:
• Physician’s office
• Patient room or bedside
• Emergency department
• Cath lab
• Interventional radiology procedure room
• Endoscopy room
• Operating room

F. Specific Examples

The following types of procedures may not initially appear to be surgical procedures but are assigned to a surgical benefit category. This list is not intended to be comprehensive to address every type of question which may arise.

1. Closed Treatment of Fractures or Dislocated Joints

Some fractures and joint dislocations can be treated with x-ray assessment, ensuring proper alignment of the bones and/or joint, and stabilization and immobilization with a cast or splint. Procedure codes for closed treatment of a fractured bone, with or without manipulation, and treatment of a closed joint dislocation, with or without anesthesia, are listed in the surgical section of the CPT book and are assigned global surgery package days on the CMS Physician Fee Schedule.

2. Application of Casts and Strapping

Procedure codes for the application of casts and/or strapping are listed in the surgical section of the CPT book and are assigned global surgery package days of 000 on the CMS Physician Fee Schedule.

(Note: Specific coding and bundling rules are listed in the CPT book and/or the CPT Assistant as to when these procedures may and may not be separately reported and/or reimbursed.)

3. Endoscopy procedures

An endoscopy is the examination and treatment of the inside of the body by using a lighted, flexible instrument called an endoscope. In general, an endoscope is introduced into the body through a natural opening such as the mouth or anus. Although endoscopy can include examination of other organs, the most common endoscopic procedures evaluate the nose, sinuses, esophagus, stomach, and portions of the intestine. Tools for cutting, grasping, cautery, balloon dilation, or other tools may be attached or passed through the endoscope instrument.

Endoscopy procedures are considered surgical procedures. Endoscopy procedure codes are listed in the surgical section of the CPT book or HCPCS codes and are assigned global surgery package days on the CMS Physician Fee Schedule.

4. Cardiac catheterization and cardiac electrophysiology procedures

Cardiac catheterization and electrophysiology procedures access the heart for examination and/or treatment by passing a small tube through the skin into a blood vessel (usually in the groin or neck) and through the blood vessels to the heart. These procedures usually take place in a special radiology procedure room (e.g., cath lab) using light sedation.
Cardiac catheterization and electrophysiology procedure codes are in the Medicine section of the CPT book but are designated as surgical procedures by Medicare.

5. **Needle biopsies and other percutaneous needle procedures**
   A number of procedures access organs, muscles, tissues, or joints with a needle inserted through the skin. This includes needle biopsies, trigger point injections, aspiration of fluid from a joint, or injection of substances into the joint, etc. These are considered surgical procedures by the AMA and/or Medicare, and the procedure codes are generally (but not always) listed in the surgical section of the CPT book.

6. **Removal of warts, skin tags, etc.**
   Warts, skin tags, actinic keratosis lesions, and other benign lesions can be removed by a variety of means, such as laser, electrosurgery, cryosurgery (application of cold, liquid nitrogen, “freezing”), application of other chemicals, etc. These procedures are considered surgical procedures, are listed in the surgical section of the CPT book, and are assigned global surgery package days on the CMS Physician Fee Schedule.

### Codes, Terms, and Definitions

#### Acronyms & Abbreviations Defined

<table>

<td>XXX</td>
<td>Global concept does not apply.</td>
</tr>
<tr>
<td>YYY</td>
<td>Carrier determines whether global concept applies and establishes postoperative period, if appropriate, at time of pricing.</td>
</tr>
<tr>
<td>ZZZ</td>
<td>Code related to another service and is always included in the global period of the other service. (Note: Physician work is associated with intra-service time and in some instances the post service time.)</td>
</tr>
</tbody>
</table>

**Coding Guidelines & Sources** - (Key quotes, not all-inclusive)

The American Medical Association (AMA) is the source of CPT codes.

The Centers for Medicare and Medicaid Services (CMS, Medicare) is the source of HCPCS Level II codes. Medicare also assigns a global surgical period (global days) indicator to all procedure codes on the Medicare Physician Fee Schedule Database (MPFSDB).

- Surgical codes have a global days indicator of “0,” “10,” “90,” “YYY,” “ZZZ,” and “MMM.”
- Non-surgical codes (medical procedures, lab tests, radiology procedures, evaluation and management services, supply procedures, DME items, etc.) have a global days indicator of “XXX” (global surgery concept does not apply).

Background Information

Every procedure code (CPT and HCPCS) is assigned to a benefit category for claims adjudication. This policy is intended to help explain why procedures which may not require an operating room or involve an incision or sutures are considered a surgical procedure and assigned to a surgical benefit category.

IMPORTANT STATEMENT

The purpose of this Reimbursement Policy is to document our payment guidelines for those services covered by a member’s medical benefit plan. Healthcare providers (facilities, physicians, and other professionals) are expected to exercise independent medical judgment in providing care to members. Our Reimbursement Policy is not intended to impact care decisions or medical practice.

Providers are responsible for submission of accurate claims using valid codes from HIPAA-approved code sets and for accurately, completely, and legibly documenting the services performed. Billed codes shall be fully supported in the medical record and/or office notes. Claims are to be coded appropriately according to industry standard coding guidelines (including but not limited to UB Editor, AMA, CPT, CPT Assistant, HCPCS, DRG guidelines, CMS’ National Correct Coding Initiative [CCI] Policy Manual, CCI table edits and other CMS guidelines).

Benefit determinations will be based on the member’s medical benefit plan. Should there be any conflicts between our Reimbursement Policy and the member’s medical benefit plan, the member’s medical benefit plan will prevail. Fee determinations will be based on the applicable provider fee schedule, whether out of network or participating provider’s agreement, and our Reimbursement Policy.

Policies may not be implemented identically on every claim due to variations in routing requirements, dates of processing, or other constraints; we strive to minimize these variations.

***** The most current version of our reimbursement policies can be found on our provider website. If you are using a printed or saved electronic version of this policy, please verify the information by going to https://www.modahealth.com/medical/policies_reimburse.shtml *****
