

Put some
heart
into your
plans to
stay healthy.

To lower your risk of developing heart disease, make healthy changes in your lifestyle. Controlling and preventing risk factors is also important for people who already have heart disease.

Some changes include:

- ▶ Watching your weight
- ▶ Quitting tobacco and staying away from secondhand smoke
- ▶ Controlling your cholesterol and blood pressure
- ▶ Drinking alcohol only in moderation
- ▶ Getting active and eating healthy
- ▶ Managing stress
